

Measuring Cutting-Width Form

If you would like help with assessing the best cutting width, please provide the measurements as detailed in this form and email the completed form to alcovewidth@shelfbar.co.uk

We will email you back our suggestion for cutting width based on your measurements.

Please also see our website measuring advice <https://shelfbar.co.uk/faqs/#1555936304793-fb28ebbb-0243> *What's the best way to measure the alcove width?*

B = Back (actual width of alcove along back wall)

F = Front (actual width of alcove at approximate front of shelf position, this will depend on shelf depth **D** you require eg 145,200,250, 300, 350)

A= Alcove Depth (approx)
